

Kids learn to type by racing.

Every key moves the racer. Real touch typing for ages 4–9 – ten minutes a day.

Hi families! Our class is learning to touch type with **Bumpy Keys** on the school iPads. Your racer can keep going at home – the app is free to start, and ten minutes a day is plenty.

— _____ (teacher)

What your child is learning

Home row first

Pointer fingers on the two bumpy keys, **F** and **J**. Every finger has a colour and a shape, so "which finger" never needs reading.

Careful, then quick

Accuracy earns levels; speed earns the third star. Bumper the bear coaches out loud, so pre-readers can play.

Real keys, or the screen

Works with any iPad keyboard case – or big on-screen keys with cartoon hands showing where fingers go.

Get it at home (2 minutes)

- 1 • Scan the code, or search **Bumpy Keys** in the App Store on an iPad.
- 2 • Your child picks a world – that one's free forever.
- 3 • Play the daily quest: ten minutes, then a certificate to hang on the fridge.

bumpykeys.vercel.app

Free to start • One purchase unlocks all worlds (\$4.99) • No ads • No accounts • No data collected • Works offline
